

# Partner Profile

## Our Mission

To ensure every community has equitable access to active spaces by designing and building complete play and recreation environments while skillfully handling every detail to make the process seamless and easy.

## Our Partnership Goal

Applying decades of in-house project and construction management with a product portfolio of 40+ outdoor recreation equipment brands to streamline complex projects and create a turnkey Community Hub tailored to your vision.

## How we serve you

- 1** A dedicated project team, including a landscape architect, designers & installers to save time and resources.
- 2** Years of experience designing inclusive, intergenerational play and recreation spaces.
- 3** Ongoing support and maintenance to maximize the longevity of your investment.

## The Details

USTA and Impact Parks joined forces to introduce Community Hub concepts to park agencies nationwide. This initiative brings tennis and other racket sports into neighborhood parks, seamlessly integrating these activities with other family-friendly elements (play, outdoor fitness, shade, and site amenities.) Our hubs are designed as intergenerational destinations, encouraging families and individuals to stay and play longer, fostering positive health outcomes.

We can handle all aspects of the project, with a menu of services you can choose to ensure we're making it easy in all the ways you value. We are dedicated to collaborating with park agencies to enhance these essential spaces, ensuring they create lasting benefits for every communities served.
